Presentation

Data Scientist specializing in cloud data pipelines, model containerization, and ML lifecycle workflows. Experienced in applying software engineering practices to bridge the gap between data science and production environments.

Skills

Programming: Python, R, SQL, Java

Software & DevOps: GitHub actions, Gitlab, FastAPI, Docker

MLOps & ML Frameworks: PyTorch, Scikit-Learn, MLflow, mlr3, DVC

Data Engineering & Cloud: GCP, Databricks, PySpark, Airflow, dbt, Apache Beam

Languages: Spanish (native), English, French

Experience

Accenture, Data Engineer — Madrid, ES
Development of data ingestion platform in financial services sector — Sept 2025 – present — 1 year 3 months

- Designed and developed end-to-end data pipelines for structured, semi-structured, and unstructured data, writing maintainable Python code integrated into cloud environments.
- Containerized ingestion workloads with Docker and deployed serverless tasks to GCP Cloud Run.
- Applied software engineering practices: version control, code reviews via GitLab, and testing.

Havas Media, Data Scientist — Madrid, ES
Developed core components of an internal BI platform, turning business requirements into scalable data products and insights. — Sept 2023 – Sept 2025 — 2 years 1 month

- Designed and executed the data warehouse architecture (schemas, relationships, and analytical tables).
- Built automated data processing and analytical pipelines using Databricks, Python, R and SQL (BigQuery).
- Built automated Databricks pipelines for data processing.
- Prototyped an end-to-end Text-to-SQL chatbot to enable self-service analytics for non-technical teams.
- Implemented ML-based data imputation algorithms to enhance internal data quality and reliability.

Grupo STIN, Junior Data Scientist — Madrid, ES
Led data analysis for a strategic project tracking personnel and scaffolding via GPS-enabled wearables, delivering ML-driven insights for operational decision-making. — Sept 2021 – Apr 2022 — 8 months

- Designed and executed data-collection experiments.
- Performed data preprocessing, exploratory analysis, and visualization.
- Proposed and evaluated machine-learning models and statistical methods to extract actionable knowledge.

Education

BS **Universitat Oberta de Catalunya**, Data Science — Online, Sept 2022 – present

MS **Universidad Autónoma de Madrid**, Applied Statistics — Madrid, ES, Sept 2020 – June 2023
- Thesis: Effectiveness of Continual Learning Strategies on CNN-Based Models for Glaucoma Detection

BS **Universidad Autónoma de Madrid**, Psychology — Online, Sept 2016 – June 2020

Certifications

Professional Machine Learning Engineer (Google Cloud) 2026

Professional Data Engineer (Google Cloud) 2026

Professional Cloud DevOps Engineer (Google Cloud) 2026

Associate Data Practitioner (Google Cloud) 2026

Cloud Digital Leader (Google Cloud) 2025

Selected projects

Brand monitoring with machine learning and language models
Brand monitoring tool that scrapes news articles and performs sentiment and topic analysis in real time

Self hosting MLflow with IaC in Google Cloud
Reusable pulumi plugin to deploy MLflow in the cloud for free
